Subject: Debt-free country trading strategy

Under the umbrella of CWAK a (community welfare association Kuwait) whose mission is to serve humanity without cast, color, creed, or boundaries. First of all please accept our hearty congratulations on the historical bold and wise decision to decline the IMF package and liberate the sir-Lankan as a nation. we also acknowledge, admire, and agree with your decision to seek financial assistance from China. It's a very dignified way forward for a great nation and a bold step by the Sri Lankan government. Sometimes it becomes mandatory for the head of the state to fulfill the country's various requirements and borrow funds from the friends on short terms which is a healthy sign and strengthens the ties between the countries.

Debt is a curse and another kind of slavery that is worse than forced slavery, early detection and cures depend upon a revolutionary healthy mind, body, and progressive society. Sri Lankan government decision has proven that.

We take this opportunity to offer our financial consultancy services and share our knowledge with our brother country to rescue them from debt permanently. We would like to present an interest-free trading strategy to make a debt-free country.

We are looking forward to meeting and presenting how we can bring a paradigm shift to the existing scenario.
